SUMMARY

Senior Product Designer with 5 years of end-to-end product design experience across SaaS and mobile, from discovery and user research through wireframes, prototyping, usability testing and shipped UI. I work best where design decisions are shaped by regulation, legacy systems and business rules: pension funds, legal tech and privacy-compliant ad technology. I partner closely with Product and Engineering, contribute to design systems, and push for measurement after launch. Before design I spent 10 years in business development and founded two companies, which is why I start from the commercial problem rather than the interface. Fully remote for 4 years with teams in Eindhoven and London.

EXPERIENCE

Product Designer, Choreograph (WPP Group), Eindhoven & London | Feb 2022 – Present

Enterprise SaaS platform for omnichannel media planning and activation. Working remotely from Munich with distributed teams.

- Own the design of Create Optimization, the ads activation product: campaign setup, targeting, ad variants and trafficking. Work directly with 3 product owners and a team of around 15 engineers; contribute components and pattern improvements to the shared design system.
- Designed the Decision Tree, the platform's core targeting logic: a visual builder of starting, decision and outcome nodes that selects ad variants by date and time, location, weather, feed lookups, Meta ad sets and DSP signals. It replaced a rule-based workflow where strategy and precedence were invisible, became the platform's default workflow in August 2025, and is used daily by global brands and agencies. The product VP called it the most relevant launch in four years.
- Redesigned for scale after production trees hit ~2,500 outcome nodes: CSV-to-tree import that builds strategies from the spreadsheets teams already have, bulk tracker management with root-to-leaf inheritance, and server-side tracker generation on publish, toward a target of 5,000-node trees loading in under 5 seconds.
- Kept the interface simple against pressure to expose every feature: trackers, tagging and inheritance surfaced by context in the side panel; algorithmic content optimization runs inside tree branches without a separate workflow.
- Grounded the design in research: a 10-participant usability study with a UK agency, a multimarket audience study, and sessions with clients and agencies in Europe and Latin America. Worked with product on the adoption and reliability criteria used to evaluate the launch.
- Translated privacy and compliance requirements into reusable interaction patterns for global clients. Platform serves over 1.5 billion impressions a month across display, online video and CTV.

Product Designer, Independent (Freelance), Milan, Italy / Remote | May 2021 – Present

- **PepperLaw** (legal tech, Brazil). Lead designer, with one junior designer, for an early-stage startup whose founders had already sold the product to paying law firms. Designed the full platform in one month: information architecture, workflows, design system and landing page. Cut company formation from 12 steps to 7 and trademark registration from 10 to 6 by separating legal requirements from legacy process, and designed AI drafting and lawyer review as layers of the same flow. Plain-language rewrites validated by the founding partner, a practicing lawyer.
- **Bible+** (Bible study mobile app, a venture led by an executive at Rede Record, one of Brazil's largest TV networks). Lead designer with one junior designer. Cut a brief that listed every feature at once down to the core, based on competitor mapping and user conversations, then built the information architecture, design system and full interface in 3 months. Never launched: the founders were waiting on investment to fund audio production. No metrics to report.
- Build and ship my own products: three MVPs in React, TypeScript and Tailwind, prototyped and deployed using AI tooling.

Product Designer, IK Solution, São Paulo, Brazil | Jul 2021 – Jan 2022

Product consultancy. Client work in pensions and premium rental.

- **Petros** (Brazilian pension fund, €18B+). Lead designer with 2 developers and 1 product manager, embedded for 4 months. Reframed the brief from "more signups" to "fewer people giving up". Worked with legal to separate regulatory requirements from internal rules nobody had revisited, then proposed document scanning with OCR auto-fill so users

review data instead of typing it. Used a working prototype to get legal, marketing, sales and the business team to agree on the new flow, and negotiated a contact-preferences panel that kept marketing's channel without adding friction. Delivered to development within the engagement.

- **Le Mans** (high-value asset rental). First solo project. Started as a luxury car rental app; after market research, proposed and designed a wider platform for cars, boats, homes and helicopters, with a concierge flow that turned asset inspection into part of the service, plus an admin back office. Live today, invite-only.
- Worked in agile sprints with stakeholders, engineering and project management, from problem framing to delivery.

Business Development Manager, Fashion Film Festival Milano, Milan, Italy | Feb 2020 – Sep 2020

- Built sponsor partnerships. When Covid forced the festival online, designed the user flow for its first digital edition with the development team.

Business Development Agent, Tecnocasa Franchising S.p.A., Milan, Italy | Aug 2019 – Feb 2020

- Introduced an online lead-generation approach that produced €2M in sales leads within three months.

Key Account Manager, Espaço Villa Lobos, São Paulo, Brazil | Oct 2017 – Aug 2018

- Repositioned a major event venue into the premium market: +300% year-over-year sales growth.

Founder, Wekoop & Co., São Paulo, Brazil | Jun 2013 – Aug 2018

- Built a marketplace for high-end men's products from scratch: user research and surveys, user flows, wireframes, UX/UI design, prototype and MVP. Reached 5,000+ users organically with no paid marketing.

New Account Specialist, PicPay, São Paulo, Brazil | Oct 2012 – May 2013

- First sales representative in São Paulo for what became one of Brazil's largest digital wallets.

Account Manager & New Business, B-Young Social Media, São Paulo, Brazil | Jan 2010 – Aug 2012

- Co-founded an agency serving Unilever, Philips and Estadão. 500% growth in the first year.

SKILLS

Product strategy · Product discovery · User research and interviews · Usability testing · Journey mapping · Problem framing · Information architecture · Wireframing · Prototyping · Interaction design · UI design · Design systems · Responsive and mobile design · Accessibility · Stakeholder management · Design critique · Agile collaboration with Product and Engineering
Figma · FigJam · Storybook · Jira · Confluence · React · TypeScript · Tailwind CSS · HTML/CSS · Git · Cursor and AI-assisted prototyping

EDUCATION

UX/UI Design Certificate, CareerFoundry, Berlin, Germany | 2020

Bachelor of International Relations, ESPM, São Paulo, Brazil | 2010

LANGUAGES

Portuguese (native) · English (fluent) · Italian (fluent)
