SUMMARY

Product designer with five years designing web and mobile products. I work best where design decisions are shaped by regulation, legacy systems and business rules: pension funds, legal tech and privacy-compliant ad technology. Before design I spent a decade in business development and founded two startups, which is why I start from the commercial problem rather than the interface. I own projects end to end, framing the problem, talking to the people who live it, and shipping alongside engineers. Four years working fully remotely from Munich with teams in Amsterdam and London.

EXPERIENCE

Product Designer, Choreograph (WPP Group), Amsterdam & London | Feb 2022 – Present

Enterprise omnichannel media planning and activation platform. Working remotely from Munich with distributed teams.

- Led the redesign of a legacy, spreadsheet-based ad platform into a unified omnichannel workflow over 18 months, working with 3 designers, 15 engineers and 3 product owners.
- Cut campaign setup time by **60%** by introducing reusable decision trees for targeting logic.
- Reduced targeting and version-control errors by **75%**, resolving a recurring conflict between creative and activation teams.
- Translated privacy and compliance requirements into reusable interface patterns for global clients, working within rules that cannot simply be removed.
- Designed within real technical limits, holding system performance across large datasets.

Product Designer (Freelance), Milan, Italy / Remote | May 2021 – Present

- **PepperLaw** (legal tech, Brazil). Redesigned a legal document platform covering company formation, trademark registration and contract creation. Simplified legal terminology and multi-step flows without losing legal accuracy, and integrated AI assistance where it held up under scrutiny. Projected impact: 45% fewer abandoned forms, 60% fewer support tickets.
- **Bible+** (consumer mobile app, React Native). Designed a consumer app from concept to shipped product for an audience with no habit of using one. **70% higher engagement** than comparable apps and 2x session duration.

UX Designer, IK Solution, São Paulo | Jul 2021 – Jan 2022

Product consultancy. Client work in pensions and premium rental.

- **Petros** (Brazilian pension fund, €18B+). Lead UX designer with 2 engineers and 1 product manager. Rebuilt an onboarding flow constrained by legal data-verification requirements, government database integration and legacy systems that only accepted PDFs. Cut form fields from 20+ to 5, auto-filling 80% of government data, with a mobile-first photo-to-PDF converter for document upload. **55% higher signup conversion, 62% faster completion, 40% fewer support calls**. Delivered in 3 months.
- **Le Mans** (high-value asset rental). Designed a dual system: a member-facing mobile app and an admin back office covering availability, check-in/out, inspections and 2FA, structured to scale to new asset classes without rework.

EARLIER CAREER: BUSINESS DEVELOPMENT & ENTREPRENEURSHIP (2010-2020)

Ten years selling, negotiating and building businesses before moving into design in 2020.

- **Business Development Manager**, Fashion Film Festival Milano, Milan | Feb 2020 – Sep 2020. Built sponsor partnerships. When Covid forced the festival online, designed the user flow for its first digital edition with the development team.
- **Business Development Agent**, Tecnocasa Franchising S.p.A., Milan | Aug 2019 – Feb 2020. Introduced an online lead-generation approach that produced €2M in sales leads within three months.
- **Key Account Manager**, Espaço Villa Lobos, São Paulo | Oct 2017 – Aug 2018. Repositioned a major event venue into the premium market: +300% year-over-year sales growth.

- **Founder**, Wekoop & Co., São Paulo | Jun 2013 – Aug 2018. Built a marketplace for high-end men's products from scratch: research, user flows, UX/UI, prototype and MVP. Reached 5,000+ users organically with no paid marketing.
- **New Account Specialist**, PicPay, São Paulo | Oct 2012 – May 2013. First sales representative in São Paulo for what became one of Brazil's largest digital wallets.
- **Account Manager & New Business**, B-Young Social Media, São Paulo | Jan 2010 – Aug 2012. Co-founded an agency serving Unilever, Philips and Estadão. 500% growth in the first year.

EDUCATION

UX/UI Design Certificate, CareerFoundry, Berlin | 2020

BA International Relations, ESPM, São Paulo | 2010

TOOLS & SKILLS

Figma, FigJam · Design systems · User research and usability testing · Information architecture · Prototyping · Jira, Confluence

React, TypeScript, Tailwind. I built and shipped adrianoluizello.design myself, using AI tools in the build workflow, so I design understanding how the decision becomes code.
