SUMMARY

Senior Product Designer with 5 years of end-to-end product design experience across SaaS and mobile, from discovery and user research through wireframes, prototyping, usability testing and shipped UI. I work best where design decisions are shaped by regulation, legacy systems and business rules: pension funds, legal tech and privacy-compliant ad technology. I partner closely with Product and Engineering, build and maintain design systems, and stay accountable for outcomes after launch. Before design I spent 10 years in business development and founded two companies, which is why I start from the commercial problem rather than the interface. Fully remote for 4 years with teams in Eindhoven and London.

EXPERIENCE

Product Designer, Choreograph (WPP Group), Eindhoven & London | Feb 2022 – Present

Enterprise SaaS platform for omnichannel media planning and activation. Working remotely from Munich with distributed teams.

- Led the end-to-end redesign of a legacy, spreadsheet-based ad platform into a unified omnichannel workflow over 18 months, from discovery and stakeholder interviews through shipped UI, working with 3 designers, 15 engineers and 3 product owners.
- Cut campaign setup time by **60%** by introducing reusable decision trees for targeting logic.
- Reduced targeting and version-control errors by **75%**, resolving a recurring conflict between creative and activation teams.
- Built and maintained design system components and documentation, improving consistency across squads and reducing rework.
- Translated privacy and compliance requirements into reusable interaction patterns for global clients, working within rules that cannot simply be removed.
- Platform now serves close to 2 billion impressions a month for major advertisers.

Product Designer, Independent (Freelance), Milan, Italy / Remote | May 2021 – Present

- **PepperLaw** (legal tech, Brazil). Redesigned a legal document platform covering company formation, trademark registration and contract creation. Ran competitive analysis and problem framing, simplified legal terminology and multi-step flows without losing legal accuracy, and integrated AI assistance where it held up under scrutiny. Projected impact: 45% fewer abandoned forms, 60% fewer support tickets.
- **Bible+** (consumer mobile app, React Native). Designed a consumer app from concept to shipped product, covering user research, information architecture, interaction design and high-fidelity UI. **70% higher engagement** than comparable apps and 2x session duration.
- Build and ship my own products: three MVPs in React, TypeScript and Tailwind, prototyped and deployed using AI tooling.

UX Designer, IK Solution, São Paulo, Brazil | Jul 2021 – Jan 2022

Product consultancy. Client work in pensions and premium rental.

- **Petros** (Brazilian pension fund, €18B+). Lead UX designer with 2 engineers and 1 product manager. Ran user research and journey mapping on an onboarding flow constrained by legal data-verification requirements, government database integration and legacy systems that only accepted PDFs. Cut form fields from 20+ to 5, auto-filling 80% of government data, with a mobile-first photo-to-PDF converter for document upload. **55% higher signup conversion, 62% faster completion, 40% fewer support calls**. Delivered in 3 months.
- **Le Mans** (high-value asset rental). Designed a dual system: a member-facing mobile app and an admin back office covering availability, check-in/out, inspections and 2FA, structured to scale to new asset classes without rework.
- Worked in agile sprints with stakeholders, engineering and project management, from problem framing to delivery.

Business Development Manager, Fashion Film Festival Milano, Milan, Italy | Feb 2020 – Sep 2020

- Built sponsor partnerships. When Covid forced the festival online, designed the user flow for its first digital edition with the development team.

Business Development Agent, Tecnocasa Franchising S.p.A., Milan, Italy | Aug 2019 – Feb 2020

- Introduced an online lead-generation approach that produced €2M in sales leads within three months.

Key Account Manager, Espaço Villa Lobos, São Paulo, Brazil | Oct 2017 – Aug 2018

- Repositioned a major event venue into the premium market: +300% year-over-year sales growth.

Founder, Wekoop & Co., São Paulo, Brazil | Jun 2013 – Aug 2018

- Built a marketplace for high-end men's products from scratch: user research and surveys, user flows, wireframes, UX/UI design, prototype and MVP. Reached 5,000+ users organically with no paid marketing.

New Account Specialist, PicPay, São Paulo, Brazil | Oct 2012 – May 2013

- First sales representative in São Paulo for what became one of Brazil's largest digital wallets.

Account Manager & New Business, B-Young Social Media, São Paulo, Brazil | Jan 2010 – Aug 2012

- Co-founded an agency serving Unilever, Philips and Estadão. 500% growth in the first year.

SKILLS

Product strategy · Product discovery · User research and interviews · Usability testing · Journey mapping · Problem framing · Information architecture · Wireframing · Prototyping · Interaction design · UI design · Design systems · Responsive and mobile design · Accessibility · Stakeholder management · Design critique · Agile collaboration with Product and Engineering

Figma · FigJam · Storybook · Jira · Confluence · React · TypeScript · Tailwind CSS · HTML/CSS · Git · Cursor and AI-assisted prototyping

EDUCATION

UX/UI Design Certificate, CareerFoundry, Berlin, Germany | 2020

Bachelor of International Relations, ESPM, São Paulo, Brazil | 2010
